EDUCATION

University of Dayton
Master of Science in Computer Science **Dayton, OH**
GPA: **4.0/4.0**

University of South Florida **Tampa, FL**
Bachelor of Science in Computer Science **Graduated: May 2024**
GPA: **3.99/4.0**. Dean's List: 2020-2024

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Javascript, HTML, CSS, PowerApps, C#
- **Technology:** Angular, MSSQL Server, .NET Core 6, Entity Framework Core, Rasa, Kubernetes, Docker, Git, Java (Spring Boot, JUnit, Spring MVC, Hibernate JPA), Next.js, Prisma, PostgreSQL

EXPERIENCE

DataLink Software, LLC **Tampa, FL**
Software Engineer Intern May 2023 – May 2024

- Enhanced the user experience and efficiency by implementing SignalR, introducing real-time messaging and inbox features to the web solution, leading to a 40% decrease in response time for users
- Successfully led the migration of the company's flagship product, EvokeEHR, from AngularJS to Angular 12, improving user experience and code maintainability by utilizing RxJS, Ngx-Bootstrap, and Angular Material
- Modernized the company's APIs by migrating them from .NET 6 to ASP.NET Core Web API and Entity Framework Core, resulting in a 15% improvement in system scalability and performance

Tenex Software Solutions **Tampa, FL**
Software Engineer Intern September 2022 - February 2023

- Designed and implemented a web-based application utilizing ASP.NET, VB.NET, DevExpress, and HeidiSQL(MySQL and MariaDB), improved the voting process by 25% increase in user experience
- Demonstrated proficiency in user interface development by developing a responsive web-based product utilizing Bootstrap, HTML/CSS, and JavaScript, ensuring optimal user experiences across various devices
- Enhanced operational efficiency by leveraging PowerShell and Azure DevOps to automate systems management, resulting in a 50% reduction in manual labor and associated overhead costs

Paradox **Da Nang**
Machine Learning Intern (NLP), Project Olivia Bot May 2022 - July 2022

- Enhanced model performance by extracting entities from a dataset of over 200,000 dialogues, conducting data cleaning by using pandas and numpy, and effectively addressing data imbalance, ultimately improving the model's accuracy, precision, and recall from a modest 40-50% to 70-90%
- Leveraged Kubernetes with Minikube, Helm, and Docker to deploy the model on a Rasa X server, enabling it to intelligently respond to both company-related inquiries and Job Search services with remarkable efficiency
- Promoted a significant boost in team productivity, reaching 30% improvement, by seamlessly integrating Olivia Bot to the team's Slack group chat infrastructure, thus facilitating the dynamic management of work schedules and daily information updates
- Optimized the Job Searching service of Olivia by using Rasa-core to respond more contextually and increasing the response accuracy by 20%, greatly enhancing the user experience

PROJECTS

Itineready May 2024 - Present
Tech Lead Developer | React.js/Next.js, Python (FastAPI), GroqAPI (Llama3-8B), unslothAI, Google API (Custom Search), OAuth2, Prisma

- Collaborated with a team to design, develop and deploy a personalized travel recommendation app, enhancing the visitor experience for first-time travelers to a city, country, or state
- Designed and developed the app's back-end, utiltizing FastAPI to manage API calls and fine-tuning the Llama3-8B model with UnSloth to deliver personalized recommendations based on users' preferences
- Converted Figma designs into functional Next.js pages, bringing the app's UI/UX vision to life
